Web Developer

Cowes, Isle of Wight, UK

Remote options considered in the UK or Brazil

We have an exciting opportunity for someone to join our Digital team as a front-end developer. You will work to create and maintain our websites and digital systems; helping us to realise the potential of digital technology and achieve our mission. You will be an excellent problem solver, with strong analytical skills and a technical mindset and knowledge of the React JavaScript library. You will be confident working with others and communicating with non-technical colleagues.

Role & Responsibilities

You will carry out the following activities within the Digital Team:

- **Front-End Development.** Building and maintaining the front-end interfaces for our various software systems, working with modern software tools in a creative, collaborative environment.
- **Optimisation.** Working to ensure that our sites and systems are developed with modern software development best practice, and meet the high standards expected by our users in terms of performance, accessibility and usability.
- **Technical Support.** Working with content owners and stakeholders to ensure that they understand how to use our software to meet their needs.
- **Testing.** Carrying out functional and user testing of our systems and of new features as they are developed, to ensure the high quality of our products.
- **Agile Development.** Collaborating with other developers, designers and UX researchers as part of an agile team, to provide digital solutions for the Ellen MacArthur Foundation.

Your Profile

You will be:

- Qualified to degree level in Computer Science or related studies, with a good academic record in relevant disciplines.
- Experienced with React, with proven experience working on front-end systems.
- Self-driven with a high level of motivation. Demonstrating a willingness to learn.
- Experienced with some of the following additional technologies:
  - Contentful CMS
  - GraphQL
o Git or other version control systems.
o Modern Web Development practices.
o PHP or Python programming languages
• An excellent communicator. The ability to interact effectively at all levels of an organisation and to contribute proactively to problem solving in meetings and workshops is essential.
• Excellent at organising your own workflow and coordinating with other members of your team.

Please apply with CV and covering letter to: Barbara Calland (barbara@emf.org)

Desired starting date: asap
Closing date: 14th March 2022
Salary package: circa £34k dependent on experience level plus generous holiday allowance (25 days plus discretionary extra days leave) generous parental leave; enhanced pension options/private health scheme after 6 months; wellbeing programme
Location: Cowes, Isle of Wight ideally but we do have some flexibility on this.

What we do
The Ellen MacArthur Foundation develops and promotes the idea of a circular economy. We work with, and inspire, business, academia, policymakers, and institutions to mobilise systems solutions at scale, globally. Our mission is to accelerate the transition to a circular economy. Our vision is a new economic system that delivers better outcomes for people and the environment. Business models, products, and materials are designed to increase use and reuse, replicating the balance of the natural world, where nothing becomes waste and everything has value. A circular economy, increasingly built on renewable energy and materials, is distributed, diverse, and inclusive.

Our commitment to you
The Ellen MacArthur Foundation is committed to promoting equal opportunities in employment and providing a working environment free from discrimination. Job applicants will receive equal treatment regardless of age, disability, gender, gender reassignment, marital or civil partner status, pregnancy or maternity, race, colour, nationality, ethnic or national origin, religion or belief, sex or sexual orientation or any other characteristic protected by the laws or regulations in the locations where we operate.
